Stinger Levitator Mobile Worksta- tions (Refurbished)

The Levitator™ mobile workstation is Stinger Medical's most popular series. The Levitator™ offers the patented Feather Touch™ positioning system and advanced ergonomics for user comfort and safety. We have two configurations available: The flat top and the Laptop. The Levitator™ mobile workstation was originally designed for the medical industry. We have found that the workstations are a nice fit for other industries and businesses. We have sold workstations to schools, trucking firms for use in the shop, police departments and retail stores for use taking inventory. This product fits any place that mobile computing makes sense. **\$995.00**

Features

- Comfortable keyboard platform with optional integral gel pad wrist support for enhanced ergonomics
- Right and left hand drawers for mouse use or storage
- Convenient 135 square inch plastic front slide-out writing surface

- Simple line-of-sight screen adjustment for monitor
- Complete with power system
- Versatility
- Feather Touch™ Positioning
- Great stability
- 90 day warranty
- Power system has new battery

Custom Design

Basic ITS does custom design on Stinger Carts to meet your groups needs. Our technicians, electricians and designers do all work in house saving you time a money. The workstation in the photo below shows a Stinger Levitator that was retro-fitted to carry an onboard computer and larger monitor. The workstation passes all the field tests for use at bedside.
